

Hemlock Ski Club Member Requirements and Expectation

Skiing Ability:

Riding a chairlift: every new club member is required to be able to load and offload a chair with a minimum assistance and be able to ride the chair with his/her ski group buddy.

Skiing: every new member needs to be able to ski down a green run independently with confidence, and be able to stop safely anytime asked. Please note that our ski club is not a ski school. If the child needs to improve their skills before joining the club in order to meet the requirements, individual or group ski lessons can be booked with Sasquatch Mountain Resort. Following a first on-snow session and at coaches' discretion, a recommendation to take ski lessons with the resort can be made to the family. If the child would not return for the season after ski school lessons, a 100% refund less the \$10 administration fee will be offered.

Maturity and Behaviour:

Behaviour: Every member of the Hemlock Ski Club family need to adhere to the club's Code of Conduct, including athletes, coaches and parents. The ski training is provided in a group setting. There is typically one coach per group. The coaches are always focused on every child's well-being and are doing their best to make the day fun while providing a quality instruction to our young athletes. Any misbehaviour that affects the training session will not be accepted and parents will be called to attend to their child.

Maturity: Every child is a unique human being, and also has a different pace of development and a level of focus. You know your child the best! Kids are on the snow 4.5-5 hours. Our training is typically conducted even in bad weather and snow conditions. Before you register, please consider if your child is ready to deal with long days, and is able and willing to ski in various conditions. We promote a love for the sport of ski racing and the last thing we want is to discourage kids from skiing because of bad experience.

Equipment:

Ski equipment: The younger age groups are using a junior multi-event ski and only require straight poles, and junior boots. Boots are the most important part of the equipment equation, as they influence the movement and energy generated through each turn. Boots will progress from a side buckle (only for the youngest ages), to two/three front buckles and eventually to a full race boot. For the younger athlete, shorter skis can allow more versatility. Contact a club representative for any questions regarding the equipment.

Clothing: Kids will be skiing and playing on the snow for up to 5 hours and in varying weather conditions. Kids should always carry spare gloves, socks and an extra layer that they will leave in the club cabin. Layering is recommended as it is easy to adjust to changing weather conditions. If the child is cold or wet, and requires a special attention, parents will be called to attend to their child.
